

Improve child health

Provide children with access to good quality healthcare and WASH to improve their health and protect them from the negative effects of air pollution.

Encourage and support children and youth to participate in local environmental activities.

Increase understanding that child health, growth and development depends on both controlling root environmental causes of poor health, and clinical responses to disease.

Provide proper medical treatment to children with asthma, and other chronic respiratory conditions.

Increase the coverage of pneumococcal vaccines and treatment in community care centers.

Provide oxygen treatment innovations such as low cost oxygen concentrators.

O₂

Provide amoxicillin dispersible tablets as a first-line treatment.

Promote exclusive breastfeeding in the first 6 months to help prevent pneumonia.

Improve child nutrition to help fight air pollution related diseases.

Provide prenatal and postnatal healthcare for mothers and children.
